

Patronus

BASCOM Patronus™ was built specifically for libraries by combining flexible, unobtrusive filtering with robust Internet security.

Built for Libraries

- Simple for librarians to **manage access** and **override filter**.
- Easily create a **separate guest network** for patron WiFi access.
- Built-in filter and firewall to **secure your network** from Internet threats.

Built for Libraries

Web Filtering

- Delivers advanced filtering with robust security
- Directs access to an allowed list of sites for children
- Provides an age-appropriate Internet experience for teens
- Opens access or uses unobtrusive filtering for adults
- Supports YouTube for Schools*
- Enforces SafeSearch (including cached sites and images)

* YouTube doesn't currently support the use of YouTube for Schools on iOS devices.

Patron Connect™—Private Patron Network

Patron Connect™ provides an additional Ethernet Interface for simply and inexpensively creating a separate, secure network for patrons.

- Creates a guest network for patron WiFi access
- Separates patron WiFi access from staff computers without purchasing an additional Internet connection, router, and firewall
- Use as a DMZ to serve web pages or provide Internet content to your community

Acceptable Use Policy Screen

Patronus easily creates a WiFi hotspot for your patrons without having to purchase, install, configure, and maintain additional third party software.

Instant Override

A librarian can quickly open access by logging into a profile with unrestricted access for a specified time period.

Kids Zone Web Library™

This easy-to-use online library includes thousands of educator-selected sites.

Technology Advantages

Saves Money & Improves Performance

- Provides an integrated firewall and web cache
- Includes reports for quickly analyzing Internet use

Support for:

- Windows® 8.1/8/7/Vista/XP
- Chromebook™ notebooks and Chromebox™ devices
- iOS devices (iPad®, iPhone®, and iPod touch® devices using iOS 6 or later)
- OS X® 10.6 or later

Mobile Filtering

For Chromebook Notebooks & Chromebox Devices

- Filters using our Anywhere Filter™ cloud deployment
- Works seamlessly with the Google Management Console
- Deployed using our Anywhere Filter extension

For iPad and other iOS Devices

- Uses Anywhere Filter browser app with educational features
- Quickly configures filter settings
- Enables the use of the Safari® browser with Global Proxy Support
